

ANAESTHESIA, PAIN & INTENSIVE CARE

A Quarterly, International Journal of Anesthesiology, Pain Management, Intensive Care & Resuscitation

*APICARE is an official publication of PSA (Pakistan Society of Anesthesiologists),
STSP (Society for Treatment & Study of Pain) and PARES (Pakistan Resuscitation Society)*

Vol. 18 No. 4

October - December 2014

Patron:

Brig. M. Salim, SI(M)
*Professor of Anesthesiology
President STSP
brigsaleem@dsl.net.pk*

Editor-in-Chief:

Tariq Hayat Khan
*Consultant Anesthesiologist
& Pain Specialist
Vice President STSP
apicare@yahoo.com*

Editors:

Fauzia Anis Khan
*Senior Editor
Professor of Anesthesiology,
Aga Khan University, Karachi (Pakistan)
fauzia.khan@aku.edu*

Sukhminder Jit Singh Bajwa
*Associate Professor, Department of
Anesthesiology and Intensive Care Medicine,
Gian Sagar Medical College & Hospital,
Patiala, Punjab, (India)
sukhminderbajwa@gmail.com*

Associate Editors:

AKM Akhtruzzaman (Bangladesh)
akhtruzzaman.akm@gmail.com

Fares Chedid
*Consultant Neonatologist
Tawam Hospital, Al Ain,
Abu Dhabi (UAE)
fareschedid@hotmail.com*

Zahid Akhtar Rao
*Associate Prof. of Anaesthesia,
Bahria Univ. Medical & Dental
College, Karachi (Pakistan)
zahidrao57@gmail.com*

Assistant Editors:

Instructions for authors

The 'APICARE' agrees to accept manuscripts prepared in accordance with the 'Uniform Requirement for Submission of Manuscripts Submitted to Biomedical Journals' published in the British Medical Journal 1991 ;302:334N1. All material submitted for publication should be sent exclusively to the 'APICARE'.

ETHICAL CONSIDERATIONS: If tables, illustrations or photographs, which have been already published, are included, a letter of permission for their re-publication should be obtained from author(s) as well as the editor of the journal where it was previously printed. Permission to reproduce photographs of patients whose identity is not disguised should be sent with the manuscript otherwise the eyes will be blackened out.

MATERIAL FOR PUBLICATION: The material submitted for publication may be in the form of an Original Research, a Review Article, a Case Report, Recent Advances, New Techniques, Debates, Book Review/CDs on Clinical/Medical Education, or a Letter to the Editor. Original articles should normally report original research of relevance to clinical anaesthesiology, pain management, intensive care or resuscitation, and may appear either as a paper or as short communications. The paper should be of about 2000 words, with no more than six tables or illustrations, short communications should be of about 600 words, with one table or illustration and no more than five references. Clinical case reports and brief or negative research findings may appear in this section. Review article should consist of structured overview of some relatively narrow topic providing background, recent development with reference to original literature.

Letters should normally not exceed 400 words, have no more than 10 references, and be signed by all of the authors. An article based on dissertation submitted as part of the requirement for a fellowship of the postgraduate degree awarding medical institutions can be sent for publication after the Research and Training Monitoring Cell (RTMC) have approved it. Editorials are written by invitation.

Each manuscript should include a title page (containing e-mail address, fax and phone numbers of the corresponding author), abstract, text, acknowledgments, references, tables, and legends.

Each component should begin on a new page, in the following sequence: title page: abstract and keywords: text; acknowledgments; references; tables (each table, complete with title and footnotes, on a separate page); and legends for illustrations.

The manuscript should be typed in double spacing on 8 1/2" x 11" (21.5cm x 28.0cm) white bond paper with one-inch (2.5cm) margin on both sides. It should not exceed 20 pages, excluding tables and references. There should be no more than 40 references in an Original Article, and no more than 100 in a Review Article.

TABLES AND ILLUSTRATIONS: Tables and illustrations should be submitted separately, and legends to illustrations should be typed on a separate sheet. Each table should have a title and be typed in double space without horizontal and vertical lines on an 8 1/2" x 11" (21.5 x 28.0 cm) paper. Tables should be numbered consecutively with Roman numerals in the order they are mentioned in the text. Page number should be in the upper right corner, if abbreviations are used, they should be explained in footnotes. When graphs, scatter grams, or histograms are submitted, the numerical data on which they are based should be supplied.

S.I. UNITS: System International (SI) Unit measurements should be used. All drugs must be mentioned in generic form. The commercial name may, however, be mentioned with in brackets.

FIGURES AND PHOTOGRAPHS: Should be sent only when

data cannot be expressed in any other form. These must be unmounted, glossy prints in sharp focus, 5" x 7", (12.7 x 17.3 cm) in size. These may be in black and white or in colour. Negatives, transparencies, and X-ray films should not be submitted. The number of the figure, the name of the author(s) should be printed on the back of each figure/photograph, and must be cited in the text in consecutive order. Legends must be typed on a separate sheet of paper. Legends for photographs should indicate the magnification, internal scale and the method of staining. Photographs in published articles will not be returned.

REFERENCES: Should be numbered in the order in which they are cited in the text. At the end of the article, the full list of references should give the names and initials of all authors (unless there are more than six when only the first six should be given followed by et al). The authors' names are followed by the title of the article; the title of the journal abbreviated according to the style of the Index Medicus. e.g.: Hall, RR. The heading of tissues by CO₂ laser. Br J. Surg 1971; 58:222-225. Reference to books should give the names of editors, place of publication, publisher, and year.

PEER REVIEW: Every paper will be reviewed by a member of the editorial committee, and one or more external reviewers. Statistical analysis will be examined by a statistician.

ABSTRACT: Abstracts of original article should be prepared with a structured format. The elements addressed could include objectives, design, setting, patients or other participants, interventions, and outcome measures, the results, and conclusions. Please label each section clearly with the appropriate subheading. Review article, Case report and other require a short, unstructured abstract. Commentaries do not require abstract. A list of key words should be given consisting of MeSH terms.

INTRODUCTION: This should include the purpose of the article. The rationale for the study or observation should be summarised; only strictly pertinent references should be cited; the subject should not be extensively reviewed. Data or conclusions from the work being reported should not be presented.

METHODOLOGY: The selection of the observational or experimental subjects (patients or experimental animals, including controls) should be described clearly in the methods and the apparatus used should be identified (with the manufacturers name and address in parentheses), and procedures described in sufficient detail to allow other workers to reproduce the results. References to established methods should be given, including statistical methods; references and brief descriptions for methods that have been published but are not well known should be provided; new or substantially modified methods should be described, giving reasons for using them, and evaluating their limitations. All drugs and chemicals used should be identified precisely, including generic name(s), dose(s), and route(s) of administration.

RESULTS: These should be presented in a logical sequence in the text, tables, and illustrations. All the data in the tables or illustrations should not be repeated in the text; only important observations should be emphasized or summarised.

DISCUSSION: The authors comments on the results, supported with contemporary references, including arguments and analysis of identical work done by other workers. A summary is not required. Brief acknowledgment may be made at the end.

ONLINE SUBMISSION: The manuscripts may be submitted online via our website www.apicareonline.com or sent as e-mail attachments to the head office or one of the regional offices. Pictures must be sent separately as JPEG or in TIFF format. Submission of scanned copies of the tables, diagrams, Graphs, and Pictures is not acceptable. Model submission letter may be downloaded from the website, duly filled in, signed by all of the authors and must be submitted along with the manuscript.
