

OBITUARY

Prof. Dr. Horacio A. Conesa (1943-2015)

Prof. Dr. Horacio Alejandro Conesa passed away on January 21, 2015 at the age of 71 years.

Professor Conesa remained actively engaged in teaching biostructural sciences since 1964. He was a Consulting Professor at the Faculty of Medicine of the University of Buenos Aires. He served as former Professor of Anatomy, former Director of Department and former Director of the Institute of Morphology. He played active role as President and Emeritus Member of the Argentina Association of Anatomy, president of the Society for Neuroscience Argentina, and director of the training arm of the CENIT Foundation for Research in Neuroscience.

He was an exceptional teacher, a promoter of countless scientific studies, research courses, conferences, journals and medical institutions. He left a deep mark on the medical community with his indivisible manner, friendship and patronism. The great professor has left us, but we are sure that his journey through this mortal life has given the best results possible: a generation of scientists, anatomists and physicians to various specialties of professionalism. His pride.

May his soul rest in peace, Amin!

Our sincere condolences to his family and loved ones.
